While holding my hand Lorenzo put his foot in the wading pool.

While Heather was working with her therapist she explored the finger paints for 2 minutes.

FIRST STEPS-Examples : Uses obvious sensory information to explore the world, reacting more physically than verbally.

The class was doing a pineapple tasting activity. The teacher asked Justice if he wanted to try some. Justice put it to his nose, made a face and walked away.

Paloma was in the reading area sitting on the couch. She was holding a soft doll. Paloma was rubbing the dolls face and running her fingers thru the dolls hair. No verbal comments were made.

MAKING PROGRESS-Examples: Uses one sense (such as sight only, or smell only) in a sensory experience, making 1-2 simple comments describing the experience.

During breakfast Aden exclaimed, "Teacher, teacher! Emily and the other teacher are twins, like me and Tia (his twin sister). They have pink shirts. Emily's is lighter."

Pedro was playing for a long time on the playground then came up to the teacher and said "Ms. Jenni, its hot!" Ms. Jenni responded "Why do you say that Pedro?" Pedro handed her a rock from the playground and said "Because feel the rocks, they are hot."

EXCEEDS- Examples: Conducts small hands-on/ multi-sensory experiments with adult guidance and uses observation and verbal questioning and comments to investigate and draw conclusions.

Blade and Laura were painting in the art area. They began to mix colors when the teacher asked "What do you think would happen if we added other stuff to the paint?" Each child chose a material, made a prediction, then added it to their paint. While painting they commented on each others new textures and looks. Teachers recorded observations on their paintings
